

www.om-light.com

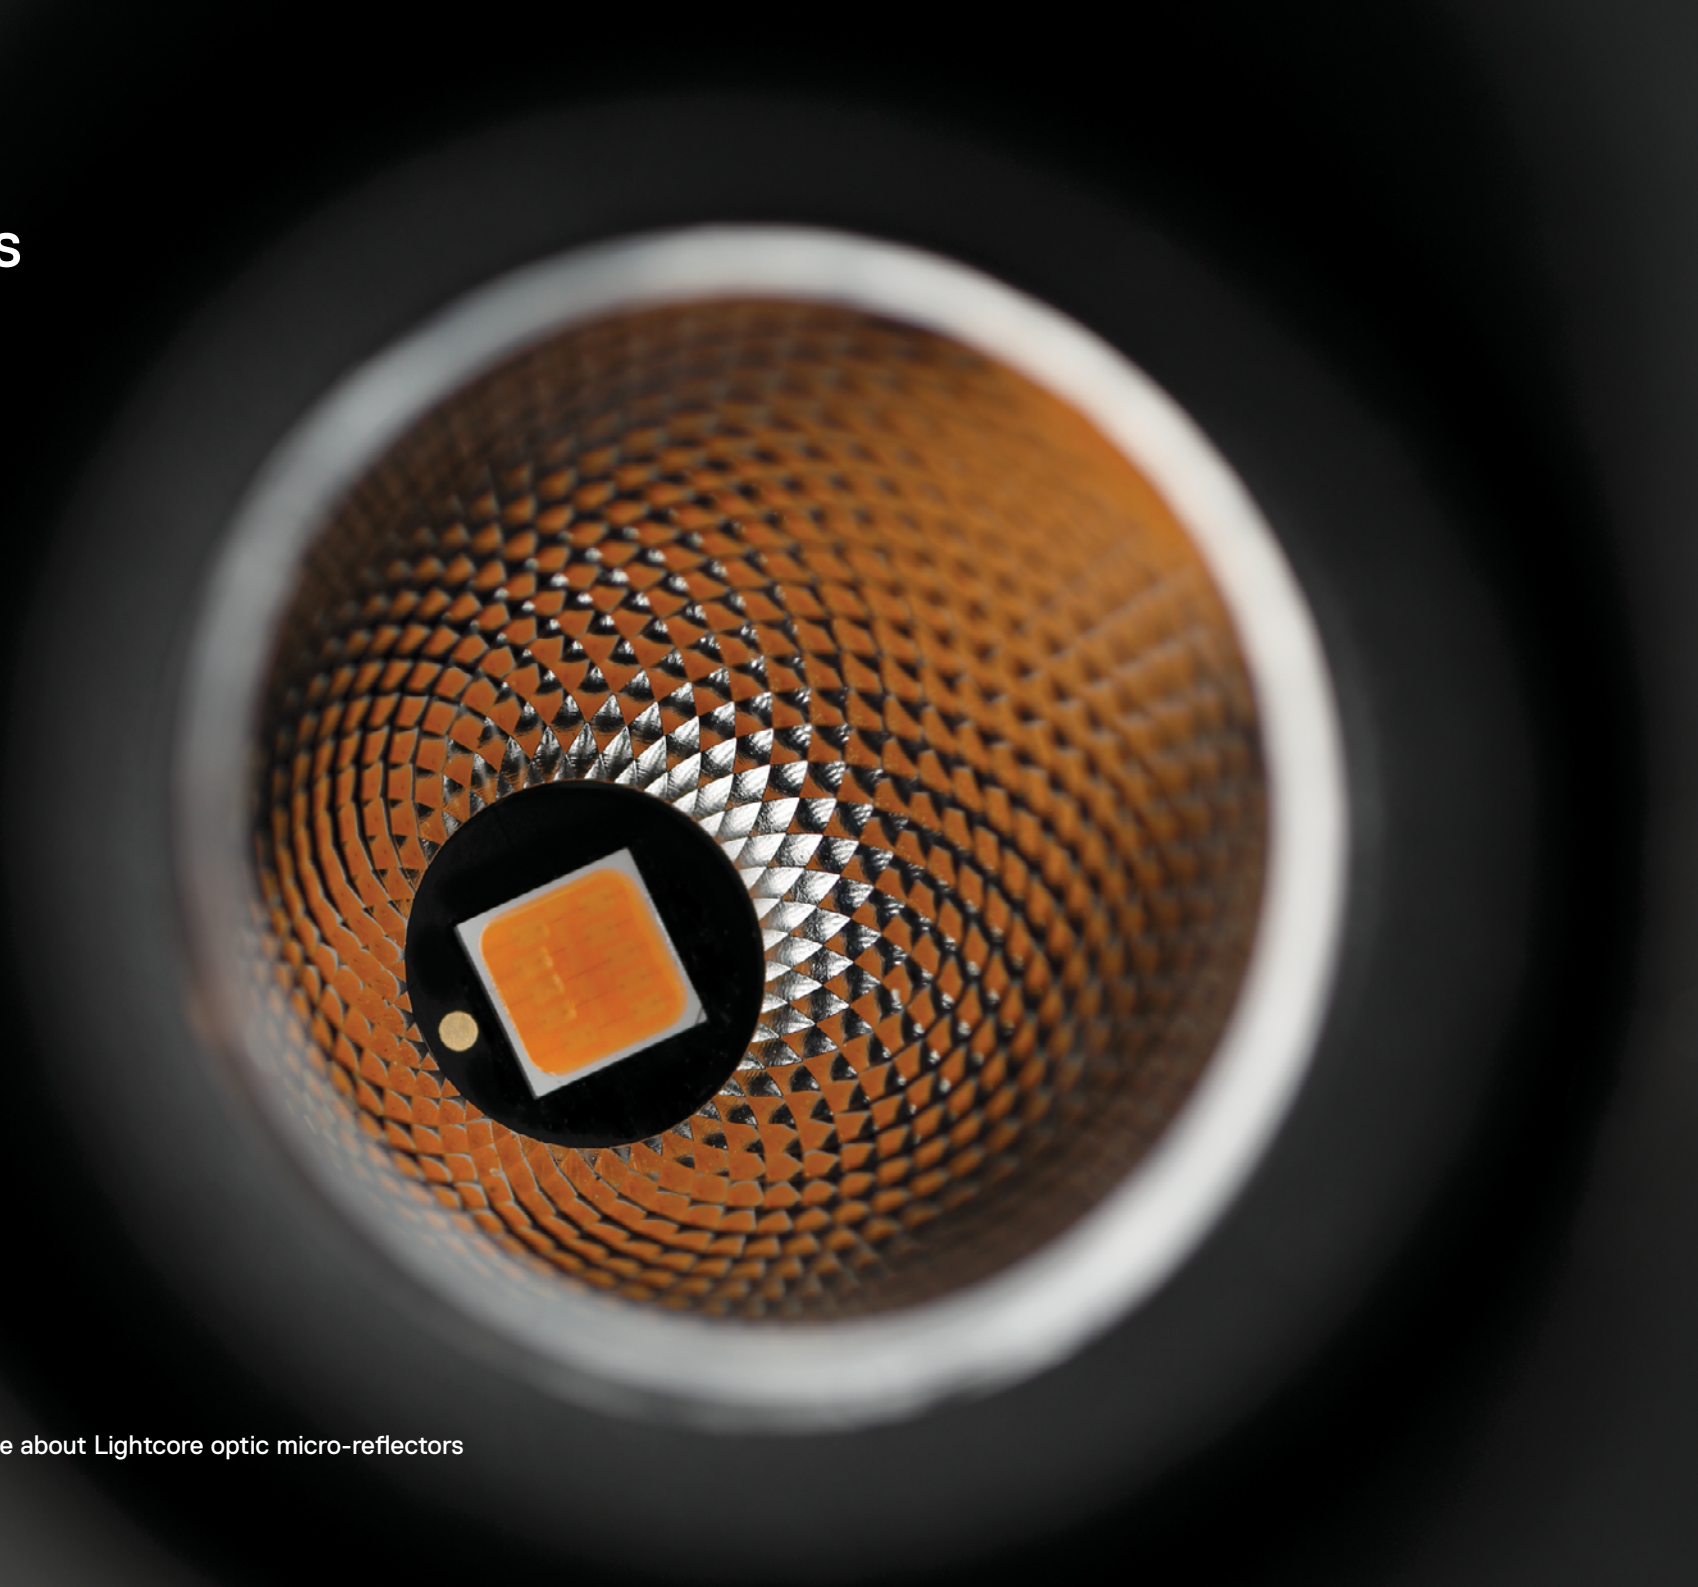

O/M is a premium brand dedicated to developing luminaires with great visual comfort and precise luminous control.

Established in 2012, its expertise
is forged from more than fifty years
of manufacturing fixtures with some
of the world's greatest architects.

It works closely with Bartenbach and other renown research centres to light spaces in new, intelligent, and innovative ways.

Along with its wide range of manufacturing services, O/M's teams tailor products to fit the exact needs of our clients.

O/M's network of on-call specialists stay involved throughout the entire process.

Rendering an object's final form,
and controlling the effect it has on
an observer, means designing with
precise technical values.

O/M provides concrete performance data on radiation patterns, glare analysis, colour consistency, TM30, CRI and mains power readings.

O/M's latest products embody a philosophy that iteration and evolution through research, data collection and analysis is the best method for creating the perfect lighting tool.
